Hi Tom,

I presume you are talking about the following clause:

"3. All advertising materials mentioning features or use of this software
* must display the following acknowledgement:
* This product includes software developed by Niels Provos."

If that's the case, you have my permission to remove the clause.

Niels.

Just checking back with you here. If you are not interested in changing the license here, please let me know that. While it would not be the outcome we would like to see, we will respect it, and will likely remove/replace this code in pagure.

Thanks again,

Tom Callaway

Thanks for the quick response! Your Blowfish block cipher for OpenBSD has been copied into python-bcrypt, The license on those files is the older BSD "with advertising" clause. We have a Python web application in Fedora (pagure) which would like to use python-bcrypt, but it is licensed under the GPL, and these two licenses are incompatible. Would you be willing to waive the advertising clause in your Blowfish block cipher code?

Thanks in advance,

Tom Callaway

What's the question?

I have a license question about your blowfish block cipher code (from 1997). Could you please email me at tcallawa@redhat.com? (or DM me here if you'd rather) Thanks in advance!
